THE COMPANION TO VOLUME 1

A curious little book about the writing of a bigger book, described as a **'Bookography'** concerning the complete development, printing and binding processes required to form the major work Casework Volume 1.

CONCEPT to CONCLUSION follows the story and timeline of the original work and the fascinating journey of the self published book through a modern book printing works employing a dedicated, skilful team.

Again, the approach is 'what has been done' opposed to the more usual 'how to do this' work, the 112 page A4 publication lavished with large colour photographs and technical detail of the printing process forms an interesting appendix to the mighty original work. A 'must have' for those who already own a copy of the first book. This slim volume also provides a taster for the print, paper, layout and sample pages of the original work to tempt those yet to take the plunge and purchase, acquire or borrow these reference works concerned with the structural repairs to historic buildings.

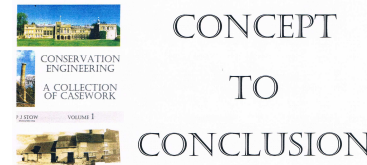

ISBN: 978 1 9161579 3 4 rrp £15.00 + £3.00 p&p
